

Too Close For Comfort - Part II

I have previously written about how a Mossad Robot rented the house opposite mine, then after a few months moved to another address on the same street, 2 houses down the road.

Well, I later realised that another Mossad Robot occupied the house across the street from mine i.e. A Mossad Robot left the house for another Robot to occupy, while he moved 2 houses down the road.

This means that I have 2 Mossad Robots surrounding me: One adjacent to me (2 houses away), and the other directly opposite.

I also stated that the 1st Mossad Robot had a dog. I later discovered that, the dog was very highly trained. At first, I thought it was odd that the dog would bark at me sometimes, yet at other times it wouldn't bark at all.

One day, the dog acted in a manner that made me believe that the owner was controlling its behaviour using some type of dog whistle that was inaudible to humans.

I reported him to the authorities.

Since then, I have not had any encounters with the dog.

(NB: I believe that the Mossad Robot with the dog didn't expect an African to know that dogs can hear sounds we humans do not hear. Pure racism.

In fact, the reason I have come to know so many of Mossad tactics, is because they have under-estimated me. Can't complain about that, because, if they didn't under-estimate me, I would be dead)

Back to the Mossad Robots.

I have stated in a previous article how Mossad set up my neighbour from across the road, so he could be kicked out of his house. They did that so their agent/robot could occupy that house.

It puzzled me why Mossad so desperately wanted to have their agent/robot as my neighbour. Previously, they seemed content to have a clue-less associate as my neighbour.

It appeared that, this time, they didn't want to entrust a clue-less associate, but had to have a Mossad agent/robot as my neighbour. Why?

I have finally discovered why.

In the past 4-6 months, my house and yard have been infested by more than a dozen pests. I have applied all the pesticides I could find in the hardware store. But the pests, though reduced, have proved impossible to eliminate.

I had pest experts come to the house and check what could be the problem. They couldn't find any reason why pests couldn't be eliminated from our home by use of normal pesticides.

Also, a section of my house has been producing a very pungent smell, at random.

Plumbers have checked and found nothing.

What other conclusion can I make?

I know it is all caused by the Mossad agents/robots surrounding me. Unfortunately, as always, I have no evidence.

My only evidence is, why is Mossad so DESPERATE to have their agents/robots as my neighbours?

Dr. David Russell-Weisz

Dr. David Russell-Weisz started working as WA Director General of Health in August 2015. Shortly afterward, Mossad took complete control of Perth, Western Australia-based Sir Charles Gairdner Hospital, SCGH.

It is obvious that Dr. D.J. Russell-Weisz is:

1. An agent of Mossad, the Israeli spy agency.
2. Very senior in the Mossad hierarchy in Australia.
